RE: "Testing two models of aggression in predicting behavioral, emotional, cognitive, social, and personality factors in a sample of detained youth"

IRB#: 01Feb12

The IRB has deemed that the research and procedures described in the modifications to a previously approved protocol application received on 4/22/13 are compliant with the University of New Orleans and federal guidelines. The modifications did not change the potential risks to the participants. The requested modifications have been approved.

Please remember that approval is only valid for one year from the original approval date. Any changes to the procedures or protocols must be reviewed and approved by the IRB prior to implementation.

If an adverse, unforeseen event occurs (e.g., physical, social, or emotional harm), you are required to inform the IRB as soon as possible after the event.

Best of luck with your project!

Sincerely,

Robert Laird, Chair
UNO Committee for the Protection of Human Subjects in Research
