Conceptual Framework:

Our conceptual framework, the theory-practice-research interaction model, permeates the programs preparing candidates for professional roles in school settings. As candidates progress through their professional studies, they are introduced to formal theories and concepts that are validated by research, which along with their personally held beliefs and assumptions, inform their professional practice. The roles and responsibilities set out the broad domains for developing competence of counseling professionals viewed through the lens of the theory-practice-research interaction model. As candidates engage in various clinical and field experiences included in their program of study, observation and study of professional practices inform and refine the educational theories and concepts they construct. Our goal is to have our candidates internalize the theory-practice-research interaction model, as they develop into reflective practitioners constantly reassessing the educational theories, beliefs, and assumptions they embrace.

Roles and Responsibilities of Professionals in Counselor Education

- Design, implement, monitor, and evaluate programs. Counselors develop effective and comprehensive programs, which incorporate an awareness of various systems that affect students, school, and home.
• Advocate for children, services, and supports. Counselors are effective advocates for students, families, and school communities.
• Provide individual, group, and family counseling. Counselors promote school success as measured by the academic, career, and personal/social development of all students.
• Offer career and academic guidance. Counselors utilize developmental approaches to assist all students and parents at points of educational transition for all students.
• Collaborate to support group practice. Counselors link multiple stakeholders in the school and community to effect positive change using strategies that are grounded in the interaction of practice and theory.
• Consult with teachers and parents/legal guardians. Counselors act as a resource regarding a variety of issues that pertain to the developmental needs of all students.
