Course Description (from catalog): Characteristics, identification, needs, teacher qualifications, and organizational patterns for the gifted and talented

Conceptual Framework:
Our conceptual framework, the theory-practice-research interaction model, permeates the programs preparing candidates for professional roles in school settings. As candidates progress through their professional studies, they are introduced to formal theories and concepts that are validated by research, which along with their personally held beliefs and assumptions, inform their professional practice. The roles and responsibilities set out the broad domains for developing competence of teacher candidates viewed through the lens of the theory-practice-research interaction model. As candidates engage in various clinical and field experiences included in their program of study, observation and study of professional practices inform and refine the educational theories and concepts they construct. Our goal is to have our candidates internalize the theory-practice-research interaction model, as they develop into reflective practitioners constantly reassessing the educational theories, beliefs, and assumptions they embrace.

***To ensure academic integrity, all students enrolled in distance learning courses at the University of New Orleans may be required to verify their identity when completing exams or other high-stakes assignments. At the discretion of the faculty member teaching the course, verification may include on-campus proctored examinations, off-site or online proctored examinations, or other reasonable measures to ensure student identity. Verification measures for this course are identified below and any fees associated are the responsibility of the student. ProctorU scheduling information and fees can be found at http://www.uno.edu/distance-education/online-testing.aspx.

NOTE: Online exams are NOT open book or open note. You are expected to take exams without such assistance. Obviously a violation of this sort is considered cheating.
